

# CovePDF

PRODUCT OVERVIEW

## INTRODUCTION

The first solution on the market for PDF files that provides **Real Time Collaboration**. In CovePDF, users can simultaneously review a document to create the desired revision and single version of the document. Besides reviewing standard-based PDF files, CovePDF allows users to edit text, sign and certify documents.

## PRODUCT IDEA

“Creating customized PDF solutions with advanced features and minimalistic design for enhancing the way companies work! While working in single trusted environment users can add annotations, edit text, sign and certify documents and set permissions to safeguard sensitive information. “

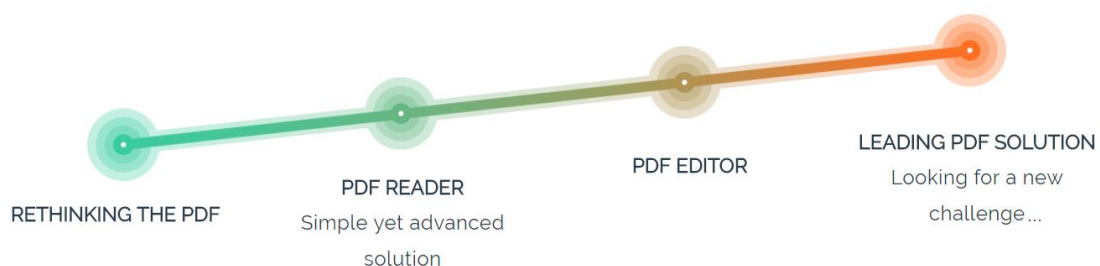

## KEY BENEFITS

- Collaborate & Review documents - add comments & markup
- Edit text within the document
- Protect document with passwords and delegate permission
- Digital Sign and verify document integrity
- Organize and restructure the flow of your document
- Time stamp your documents - prove the content of your PDFs have not changed since then

## MODERN TECHNOLOGY

CovePDF is built on Electron – one of the most up-to-date frameworks for application development.

# How can CovePDF help you?

## COLLABORATE AND REVIEW DOCUMENTS

CovePDF enables you to review documents, highlight and mark important information and comment on what needs to be modified. Now you can review documents by Collaborating together with your colleagues and see changes as they are happening in real time made by others to accelerate the revision & deliver necessary documents on time.

## TEXT EDITING WITH A SIMPLE INTERFACE

CovePDF has a minimalistic design that brings the most important features to the forefront such as Text Editing. By keeping the content to a minimum, in CovePDF editing text is straightforward. The minimalist design is user friendly and allows for quick editing of typos, paragraphs or whole pages.

## MAKE SURE YOU ARE THE MASTER OF YOUR PDFs

Set passwords or permissions, to prevent your file from being opened by other users. You can customize the permission settings to different users to restrict what others can view, change and update within the document, thus increasing file security.

## SIGN AND VERIFY THE VALIDITY OF A DOCUMENT

Speed up the process of signing documents in CovePDF by drawing or typing your signature without the need for printing or scanning. Sign the document by using your issued trusted certificate or create a new one in CovePDF. Use timestamps to generate proof that no modifications have been made to the document.

## New features implemented in CovePDF version 2.0.0 BETA:

- Collaboration
- Edit Text
- Comments Summary
  - Create Comments Summary
  - Import/Export Comments Summary
  - Send FDF via mail
